GOLDEN REINDEER AI

Agency AI Automation Suite: Client Implementation Guide

A direct operational guide detailing how the 6 requested B2B agency growth automations are engineered, triggered, and verified with live Vercel demonstration links.

Primary Platform URL: https://frontend-kappa-tan-81.vercel.app/app	**Deployment Status:** Active on Vercel
Automations Hub: https://frontend-kappa-tan-81.vercel.app/app/automations	**CRM & Lead Simulator:** https://frontend-kappa-tan-81.vercel.app/app/leads

Requirement #1: Outreach Automation [ID: outreach_auto]

Live Vercel Link: https://frontend-kappa-tan-81.vercel.app/app/automations

Strategic Purpose: Autonomous outbound multi-touch engagement for dormant leads, past inquiries, and re-activation lists via WhatsApp & SMS.

How It Works & Technical Architecture:

- **Trigger:** Contacts inactive for >30 days or tagged #cold_lead entering the CRM.
- **Cadence:** Touch 1 (Day 1: Value check-in) -> Touch 2 (Day 4: Case study/offer) -> Touch 3 (Day 7: Final breakout).
- **Smart Kill-Switch:** Sequence stops instantly the second the customer sends an inbound message to avoid awkward double-messaging.
- **Expected Agency ROI:** 12-18% reactivation rate on cold contacts with zero manual outbound labor.

Requirement #2: Lead Capture Automation [ID: lead_capture_auto]

Live Vercel Link: https://frontend-kappa-tan-81.vercel.app/app/leads

Strategic Purpose: Omni-channel sub-12-second lead ingestion linking Missed Calls, Meta Ads forms, Google LSA, and website inquiries directly into CRM.

How It Works & Technical Architecture:

- **Trigger:** Missed call detected on front-desk line or webhook payload received from Meta Ads / Google LSA.
- **Capture Speed:** Phone number and metadata recorded in CRM within 12 seconds.
- **Autonomous Response:** AI dispatches an immediate WhatsApp/SMS message: *'Hi! Sorry we missed your call. How can we help you book or answer your question right now?'*
- **Interactive Demo:** Live 3-channel inbound simulator on the Leads page testing Phone, Meta Ads, and Google LSA.

Requirement #3: Lead Routing Auto [ID: lead_routing_auto]

Live Vercel Link: https://frontend-kappa-tan-81.vercel.app/app/leads

Strategic Purpose: Smart attribution and team delegation routing every incoming lead to the exact specialist or staff member based on service type and ticket value.

How It Works & Technical Architecture:

- **Evaluation:** Analyzes the requested service (Balayage, Facial, Haircut, VIP Package) and estimated budget.
- **Rule Matrix:** High-ticket Balayage ($280+) -> **Senior Colorist (Maya)**; HydraFacial ($220+) -> **Master Aesthetician (Sarah)**; VIP inquiries -> **Studio Director**; General FAQs -> **24/7 AI Concierge**.
- **Staff Notification:** Immediate WhatsApp notification sent to the assigned specialist with the customer profile link.

Requirement #4: Qualification Auto [ID: qualification_auto]

Live Vercel Link: https://frontend-kappa-tan-81.vercel.app/app/leads

Strategic Purpose: Autonomous conversational AI scoring that profiles every lead 0–100 before staff wastes time on manual calls.

How It Works & Technical Architecture:

- **3-Pillar Scoring:** (1) Budget Intent (40 pts), (2) Timeline/Urgency (30 pts), (3) Service Clarity (30 pts).
- **Lead Tiering:** 90-100 = **Hot Lead ($280)** · 70-89 = **Warm Inquiry** · <70 = **General Info**.
- **Automated Tagging:** CRM tags updated in real time with badges visible on the live Leads table.
- **Result:** Front desk and sales reps only spend time on verified high-ticket clients.

Requirement #5: Sales Auto [ID: sales_auto]

Live Vercel Link: https://frontend-kappa-tan-81.vercel.app/app/inbox

Strategic Purpose: 24/7 autonomous closing engine that handles client objections, presents tailored pricing tiers, and locks in appointment bookings directly.

How It Works & Technical Architecture:

- **Conversational Intelligence:** Answers questions on pricing, recovery time, service ingredients, and availability.
- **Calendar Integration:** Pulls real-time open calendar slots directly from the appointment schedule.
- **Booking Handoff:** Reserves the slot, triggers a calendar invite, and dispatches automated 24h WhatsApp reminder alerts.
- **Live Demonstration:** Visible in WhatsApp Inbox (Scenario #1: Olivia Vance booking Saturday Balayage).

Requirement #6: Ads Auto [ID: ads_auto]

Live Vercel Link: https://frontend-kappa-tan-81.vercel.app/app/automations

Strategic Purpose: Closed-loop offline ad conversion attribution connecting Google LSA & Meta Ads spend directly to actual completed studio revenue.

How It Works & Technical Architecture:

- **Tracking:** Captures Google Click ID (GCLID), Meta Lead ID, and campaign UTM parameters at capture.
- **Attribution:** When appointment is marked 'Completed' in CRM, revenue data is logged against the ad source.
- **Feedback Loop:** Sends high-intent conversion signals back to Meta Conversions API & Google Offline Conversions.
- **Outcome:** Algorithms automatically prioritize high-ticket spenders, driving down Cost-Per-Acquisition (CPA) by 25-35%.

How the Client Can Test & Verify in 60 Seconds

Step 1 — Verify Automations: Open Automations Hub and click the **'B2B & Agency Suite'** tab to view all 6 active toggles.

Step 2 — Test Multi-Channel Capture: Open Leads Hub, choose ■ Meta Ads Lead, type *'Jessica Alba'*, and click **Simulate Inbound Lead**.

Step 3 — Observe Auto Routing & Scoring: Notice Jessica Alba instantly appears at the top of the table with 96/100 · Hot Lead and routed to Senior Colorist (Maya).

Step 4 — Test Sales Booking: Open WhatsApp Inbox to see the autonomous booking conversation and slot reservation in action.
